** Nylon webbing
** Solid brass grommets
** Steel buckles

TEMPERATURE RANGE Begins to melt 230 degrees C to 260 degrees C **
Usability to - 84 degrees C without becoming brittle.

BUCKLES Cobra Buckles Strength: 14KN

HORIZONTAL LIFT SLINGS Webbing tensile strength 45 KN.

VERTICAL LIFT SLING Rope tensile strength 31KN.

NSN 6530-01-659-4527

SYSTEM COMPONENTS

SKED STRETCHER - BASIC RESCUE SYSTEM INCLUDES:

- ** SKED Stretcher
- ** Cordura Back Pack/Towing Harness
- ** Horizontal Lift Slings
- ** Vertical Lift Sling (PMI E-Z Bend 9mm rope)
- ** Large steel locking carabiner (SMC)
- ** Tow Strap
- ** Set of 4 removable webbing handles

Although the SKED system works very well for virtually all rescue situations, it excels in confined space, urban, military and industrial rescue.

The PJ Sked is designed to do everything a standard Sked SK-200 will do. The only difference between the two is the standard Sked is 36 inches wide and the PJ Sked is 28 inches wide. This allows for an 8 inch shorter pack and it makes it much easier to go through a door with it across your ruck, and lighter to carry and less space in a vehicle or helicopter. Comes with Cobra® Quick Release Buckles for faster and safer patient packaging. The PJ Sked has not been tested by USAARL for hoisting, however, the Air Force PJ's are hoisting it on a regular basis.

All accessories for the standard Sked including flotation kit work on the PJ Sked.

Used by the following Countries:

- USA
- UK
- Italy
- Germany
- France
- Spain
- Denmark
- Sweden
- Lithuania
- Romania
- Slovakia
- Greece
- Belgium
- Ukrain
- Finland
